

USAF AI Readiness & Governance Assessment (Public, Non-Operational)

Generated: 2025-12-18T11:25:28

Overall Score: 54 | Band: Developing

Domain Scores:

- Data & Interoperability: 80
- Infrastructure & MLOps: 7
- Model Governance & Assurance: 60
- Responsible AI & Ethics: 60
- Workforce & Change Management: 67
- Deployment & Sustainment: 56

Risk Flags:

- [RED] RR_MONITORING_NONE: No production monitoring; elevated risk of silent model failure and unavailability
- [AMBER] RR_INCIDENT_RESPONSE_WEAK: Incident response is ad hoc; slower recovery from model issues
- [AMBER] RR_SUSTAINMENT_RISK: Sustainment ownership/funding unclear; risk of pilot-to-production transition

Top Priority Actions:

- Create a drift response playbook (Effort: S)
- Implement baseline production monitoring (Effort: M)
- Create an incident response runbook for model issues (Effort: S)
- Publish a lifecycle roadmap and review cadence (Effort: S)
- Implement rollback and safe-disable mechanisms (Effort: M)
